

SCHOTTEL Nederland BV

Mechanical Field Service Engineer

Zoetermeer, Netherlands (hybrid) Employee Mechanical Engineering

Welcome on Board!

We are SCHOTTEL, a global leader in the manufacture of steerable propulsion systems for ships and offshore applications. Since our founding in 1921, we have been designing and producing azimuth and complete propulsion systems with power ratings up to 30 MW for vessels of all sizes and types.

Through significant investment in research and development, we continuously refine our existing products and introduce innovative system solutions.

With 100 sales and service locations worldwide, we maintain close proximity to our customers.

Our client' ships navigate all seven seas, and we are there wherever they go. Across the globe, the shipping industry depends on the unmatched quality of our propulsion systems, as well as the expertise, experience, and exceptional problem-solving skills of our service professionals.

Our business is expanding and we are committed to investing in our people. We are currently seeking 2 Mechanical Field Service Engineers.

Tasks

- Install and commission propulsion systems on various vessels.
- Conduct system start-ups and ensure proper functionality according to specifications.
- Perform scheduled maintenance and inspections of propulsion systems.
- Diagnose and troubleshoot mechanical issues, and execute repairs promptly.
- Replace or repair defective parts and components.
- Provide on-site technical support and training to customers.
- Respond to service calls and emergency repairs, ensuring minimal downtime for customers.
- Maintain strong relationships with customers, addressing their needs and concerns.

- Maintain accurate records of service activities, including reports on installations, maintenance, and repairs.
- Document technical issues and solutions for future reference.

Requirements

Qualifications:

- Minimum degree of MBO-3 in Mechanical Engineering or a related field.
- +2 years of experience in mechanical field service, preferably in propulsion systems or a related industry.
- Proven track record of successful installations, maintenance, and repairs
- Strong mechanical aptitude and problem-solving skills.
- Proficiency in reading and interpreting technical drawings and schematics.
- Familiarity with diagnostic tools and software used in the industry.
- Excellent communication and interpersonal skills.
- Ability to work independently and manage time effectively.
- Fluency in English. Dutch and French are a plus but not a must.
- Enjoy travelling (up to 80% of the time) and working in various environments, including onboard ships and industrial sites.
- A valid driver's license.

Benefits

- A competitive salary package tailored to your experience.
- 25 days of vacation + 13 additional ADV days.
- Fully paid pension by SCHOTTEL.
- Long-term perspective for personal and professional growth, with both internal and external training opportunities.
- Friendly work atmosphere with a team and management that truly supports you.
- Long-term perspective for personal and professional growth, with both internal and external training opportunities.
- Laptop, mobile phone, and ergonomic workstation while working from Zoetermeer.

- Fun team events, Summer and Christmas parties.

Why SCHOTTEL?

- Work with a **global leader** in the maritime propulsion industry.
- Be part of a **dynamic and supportive team** that supports you and our customers.
- Attractive compensation package with opportunities for professional growth and development.
- Contribute to groundbreaking technologies used in a variety of marine and offshore applications.
